Before Starting

What Is the Statistical Abstract of the United States?

The *Statistical Abstract* is the Nation's best known and most popular single source of statistics on the social, political, and economic organization of the country. The *Abstract* has been published since 1878 while the compact disc version first appeared in 1993. Each is designed to serve as a convenient, easy-to-use statistical reference source and guide to statistical publications and sources. Both contain over 1,400 tables from almost 300 different governmental, private, and international organizations.

What's New for 2000

As usual, we have updated most of the more than 1,500 tables and charts that were on the previous disc with new or more recent data. The spreadsheet files, which are available in both Excel and Lotus formats, will usually have more information than the tables displayed in the book or Adobe Acrobat files. This year we have introduced almost 100 new tables covering a wide range of subject areas. We have reinstated a smaller version of the Industrial Outlook Section (now 31) and have included a separate section (32) with 21 summary industry tables from the 1997 Economic Census

based on the North American Industry Classification system (NAICS). Other new tables cover such topics as prescription drug sales, public school building conditions, charter schools, distance education, HMOs, income-tested benefits, employment projections, household debt, mutual fund ownership, commercial industry space revenue, hazardous material shipments, bridge conditions, home remodeling, firearms manufactures, and e-commerce sales. For a complete list of new tables, see Appendix VI, pp. 941.

The disc also includes content not found in the book such as—

- A special new section featuring early population results from the 2000 census for states, metropolitan areas, large cities, and counties.
- PDFs providing more explanation of several major economic series including the Federal Budget, the National Income and Product Accounts (NIPA), the Consumer Price Index (CPI) and Producer Price Index (PPI), and the new North American Industry Classification System (NAICS). Another PDF provides information on the Federal court system. Links to these supplemental materials are provided from each appropriate table.
- Maps of each state and their metro areas and component counties, maps outlining National Park sites throughout the country, a map of the United States with major transportation facilities and routes, a U.S. map locating coal mines and facilities, and one depicting the distribution of forest land.

The Adobe Acrobat Reader and Search engine, Version 4.0, is on the disc. The Acrobat Reader allows users to view, navigate, search, and print on demand any of the pages from the book. **We strongly recommend that you install this version of Adobe Acrobat Reader to your hard disk for use with this CD-ROM.**

Copyrighted Tables

This is a reminder that there are a number of tables on the disc (just like the book) that are subject to copyright restrictions. The restrictions are indicated in the source notes below each table. Permission to reproduce copyrighted material must be obtained directly from the copyright owner. There are several tables that only appear in the printed version of the book as the copyright holder withheld permission to release on the compact disc. These are so noted by the table number, title, and a statement.

Getting Started

Your Options (Adobe Acrobat, Excel, and Lotus)

The compact disc again provides users with several different methods to use the information. We believe that this will allow the user choices in terms of equipment, operating environment or system, and independent software access.

Adobe Acrobat offers the advantage of higher quality output. Acrobat also runs on many different types of platforms and environments such as Windows 95/98 or NT and the UNIX operating environment. The Acrobat Search function allows users to easily find information on the disc by retrieving the individual table or PDF file (see “Searching and Navigating”).

The Statistical Abstract tables and the population of metropolitan areas appendix table are also available in both Excel (.xls or .xlw) and Lotus spreadsheet (.wk1 or .wk4) formats. In most cases, these spreadsheet files offer the user direct access to more data than either shown in the publication or Adobe Acrobat. These files usually contain more years of data, more geographic areas, and/or more categories of subjects. For instance, the weather tables (408-414) present data for about 70 weather stations or cities in the Adobe Acrobat or book version while the Excel and Lotus files contain over 280 areas. The national income tables (715 and 722) contain data back to the 1950s. In some files, definitions and

survey descriptions may be found below the tabular information. The user must supply his or her own software or use the free Microsoft Excel Viewer found on the disc to access either spreadsheet file. The PDF files are hyperlinked to the spreadsheet files so that a user can display simultaneously the Acrobat PDF file and a spreadsheet file.

System Requirements

For Adobe Acrobat 4.0x

Windows

- 486 or Pentium processor-based personal computer
- Microsoft Windows 95, Windows 98, or Windows NT 4.0 with Service Pack 3 or later
- 10 MB of available RAM on Windows 95 and Windows 98 (16 MB recommended)
- 16 MB of available RAM on Windows NT (24 MB recommended)
- 10 MB of available hard-disk space
- 50 MB of additional hard-disk space for Asian fonts (required for Acrobat Reader 4.0 CD-ROM, otherwise optional)

Note: Microsoft Windows Millennium Edition (Windows Me), released on September 14, 2000, is an upgrade to the Windows 95 and Windows 98 operating systems. Since Windows Me was released

after Adobe Acrobat 4.0x, Adobe Acrobat 4.0x was not tested with and is not supported on Windows Me. Adobe Technical Support can assist you with using Acrobat 4.0x and can help you troubleshoot issues that also occur in Windows 98 or Windows NT.

IBM AIX

- IBM AIX 4.2.1 or later
- Common Desktop Environment (CDE) 1.0 or Motif
- 32 MB of available RAM
- 12 MB of available hard-disk space

DEC OSF/1

- DEC OSF/1 Version 4.0 or later
- 32 MB of available RAM
- 12 MB of available hard-disk space

HP-UX

- HP 9000 Series Workstations Model 700 or higher
- Hewlett-Packard HP-UX Version 9.0.3 or later
- X Window System X11R5 with HP-VUE or Common Desktop Environment (CDE) 1.0 or later
- 32 MB of available RAM
- 12 MB of available hard-disk space

SGI IRIX

- Silicon Graphics IRIX 5.3 or later
- 32 MB of available RAM
- 12 MB of available hard-disk space

LINUX

- Red Hat Linux 5.1 or later (non-glibc versions) or Slackware Linux 2.0 or later (non-glibc versions)
- 32 MB of available RAM
- 12 MB of available hard-disk space

Sun Solaris X86 and Sun Solaris SPARCstation

- Sun Solaris 2.3 or later
- Sun OpenWindows 3.0 or later, Motif 1.2.3 or later, OpenLook 3.0, or Common Desktop Environment (CDE) 1.0 or later
- 32 MB of available RAM
- 12 MB of available hard-disk space
- Note: Acrobat Reader will not run under SunOS or Solaris 2.0, 2.1, or 2.2.

Installing Software

Adobe Acrobat

This CD-ROM contains the Acrobat Reader 4.0 installers with Acrobat Search for Windows and Unix. For the best results in its use, you should use a search enabled version of Acrobat 4.0 (instructions below). The *Statistical Abstract* is presented as a series of PDF (Adobe Acrobat Portable Document Format) files in the [CD DRIVE]:\PDF directory on the CD-ROM. To view these files, you must first install the Adobe Acrobat Reader. **You will want to install the version of this Reader on the CD-ROM. Before installing, uninstall Adobe Acrobat 3.x and Acrobat Reader 3.x. After installation, remember to reboot your computer.**

Users with Adobe Acrobat 4.0 currently installed do not need to install the Acrobat Reader 4.0. However, it is important that the Web Capture Preference in the drop down file menu be changed to open Weblinks in a Web browser and not Adobe Acrobat.

Windows users

The “Install Software” section, found on the opening screen of the DemoShield application, handles the installation of the Adobe Acrobat and other viewing tools. It is recommended that you use

the Statistical Abstract DemoShield application for installing the Adobe Acrobat Reader. You may want to begin all your user sessions from within the DemoShield application, but that is optional.

The AutoPlay feature has been enabled for Microsoft Windows 95/98 users. This will cause the DemoShield application to automatically start on your desktop when the disc is inserted in the drive. If you are not using Windows 95/98 or have disabled the AutoPlay feature in that environment, the DemoShield application must be started manually. To start the application in this manner, all Window users should use either the Explorer or the Program Manager to double-click the STATAB00 icon and then double-click the file named launch.exe. This will load the appropriate files for your version of Windows to allow you to use the DemoShield application. This can also be done from “Run” in the “Start” menu by entering [CD DRIVE]:\launch.exe, where the [CD DRIVE] is replaced with the corresponding letter of your CD reader on your computer.

UNIX users

To run the installation script:

- Change to the directory containing installation script: [CD DRIVE]:/ACROREAD/ and review the installation instructions in UNIXREAD.TXT.
- Start the installation script. The filename of the script may be uppercase or lowercase depending on your system.
- Follow the instructions that appear on your screen. If you make a mistake, you can either exit at different points in the procedure or press the interrupt key sequence to cancel the installation.

Microsoft Excel Viewer

The “Install Software” section, found on the opening screen of the DemoShield application, handles the installation of the Microsoft Excel Viewer, and other related viewing tools. It is recommended that you use the Statistical Abstract DemoShield application for installing this software. You do not need Excel installed on your computer to install the Viewer.

However, installation of this software is optional. If you already have spreadsheet software, you probably do not need to install this Viewer. If you do install the Viewer, you will be able to open, view, copy, and print the content of Excel .xls spreadsheet files found on this CD-ROM. You cannot edit or save an open workbook or create new workbooks in Microsoft Excel Viewer.

Navigating and Searching

Users that are not familiar with Adobe Acrobat should take a few minutes to review the navigating and searching information, which is available by selecting the “How to Use” button on the opening screen. A tutorial demonstration of these tools is presented. Most of the material covered below on the Adobe icons is covered in more detail in those demonstrations.

The easiest and simplest way for a new user to navigate through the *Statistical Abstract* CD-ROM is to start with the Contents document, which may be opened after installing or launching Acrobat. Another option is to launch the Adobe Acrobat software directly from the DemoShield application software. Both methods will bring the user to a screen displaying both the complete alphabetical index of key words like you would find in the book and the table of contents (see Figure 1). This screen affords the user three choices for locating the desired information or table: (1) to search using the index, which provides direct links to the tables, (2) to go directly into a topical section such as “Population” or “Health and Nutrition” and page through the section, or (3) to use the “Search” function. Users simply enter a keyword or phrase to conduct a full-text search of all files on the CD, including text within graphics and charts. A thesaurus is available to facilitate and assist in the search.

Figure 1. **PDF Contents Page**

● Section 1. Population (Tables 1 - 76)	● Section 11. National Defense and Veterans Affairs (Tables 565 - 597)	● Section 21. Transportation—Land (Tables 1007 - 1065)	● Section 32. 1997 Economic Census (Tables 1438 - 1458)
● Section 2. Vital Statistics (Tables 77 - 150)	● Section 12. Social Insurance and Human Services (Tables 598 - 642)	● Section 22. Transportation—Air and Water (Tables 1066 - 1096)	● Appendix I. Guide to Sources of Statistics
● Section 3. Health and Nutrition (Tables 151 - 238)	● Section 13. Labor Force, Employment, and Earnings (Tables 643 - 714)	● Section 23. Agriculture (Tables 1097 - 1144)	● Guide to State Statistical Abstracts
● Section 4. Education (Tables 239 - 328)	● Section 14. Income, Expenditures, and Wealth (Tables 715 - 766)	● Section 24. Natural Resources (Tables 1145 - 1186)	● Guide to Foreign Statistical Abstracts
● Section 5. Law Enforcement, Courts, and Prisons (Tables 329 - 379)	● Section 15. Prices (Tables 767 - 785)	● Section 25. Construction and Housing (Tables 1187 - 1228)	● Appendix II. Metropolitan Areas: Concepts, Components, and Population
● Section 6. Geography and Environment (Tables 380 - 414)	● Section 16. Banking, Finance, and Insurance (Tables 786 - 853)	● Section 26. Manufactures (Tables 1229 - 1269)	● Appendix III. Limitations of the Data
● Section 7. Parks, Recreation, and Travel (Tables 415 - 451)	● Section 17. Business Enterprise (Tables 854 - 905)	● Section 27. Domestic Trade and Services (Tables 1270 - 1306)	● Appendix IV. Weights and Measures
● Section 8. Elections (Tables 452 - 489)	● Section 18. Communications and Information Technology (Tables 906 - 941)	● Section 28. Foreign Commerce and Aid (Tables 1307 - 1332)	● Appendix V. Tables Deleted From the 1999 Edition of the Statistical Abstract
● Section 9. State and Local Government Finances and Employment (Tables 490 - 531)	● Section 19. Energy (Tables 942 - 977)	● Section 29. Outlying Areas (Tables 1333 - 1349)	● Appendix VI. New Tables
● Section 10. Federal Government Finances and Employment (Tables 532 - 564)	● Section 20. Science and Technology (Tables 978 - 1006)	● Section 30. Comparative International Statistics (Tables 1350 - 1412)	● Index
		● Section 31. Industrial Outlook (Tables 1413 - 1437)	● Supplemental Material
			● Economic Indicators
			● Map
			● Statistical Abstract Web Site
			● Telephone Contacts

We have improved and enhanced data on the disc and the software used for accessing the information. The enrichments to the data and their access include:

- Our table of contents page which now has a PDF of our web site. This will enable you to have direct links to the *Statistical Abstract* and its supplements and other features, such as *Statistics in Brief* and Frequently Requested Tables.
- A link to our table of contents from the first text page of each section facilitates quick movement between sections of the book.

Adobe Icons and Help

First, if you are not familiar with Adobe Acrobat, we strongly encourage you to read the “Adobe Acrobat 4.0 Guide” that may be accessed using the “Help” function on the top menu bar once Acrobat is launched. The “Looking at the Work Area” section will provide a quick overview of the Acrobat icons and features that you will need in order to fully utilize this disc. A few minutes with this handy guide is well worth your time.

You can navigate in PDF documents by paging through them or by using the navigational structures (bookmarks and thumbnails). The main icons that you will use in paging through appear in Figure 2 and in the command bar near the top of your Acrobat window. Bookmarks, which provide a visual table of contents for each section or a list of tables in most cases, appear in an area called the navigation pane on the left side of the screen. You may switch to

thumbnails or miniature versions of the document pages. The “Document” and “Window” options on the top menu bar provide another way of accessing the same navigational options.

Figure 2. **Adobe Icons**

Previous Page or Next Page

Go to Previous View or
Go to Next View

First Page or Last Page

The “Search” and “Find” functions (Figure 3) appear very similar in appearance, but can yield very different results. We recommend that you use the “Search” function as it is more powerful and will usually yield the desired results.

Figure 3. **Find, Search, and Search Results Icons**

Find

Search

Search Results

Buttons

Two buttons (see Figure 4) to the side of each table provide hyperlinks to spreadsheet files associated with each table. If your Excel or Lotus spreadsheet program is not loaded, Acrobat will launch your software package and bring the attached spreadsheet to your screen. If you want to move between the PDF and its associated spreadsheet, use “ALT” key, then the “TAB” key to toggle between the PDF file and spreadsheet.

All tables have a third button designated “Internet” that provides a hyperlink to U.S. Government statistical agencies on the World Wide Web and, for the first time, a link to all private and international sources. These sites may offer additional or more recent information or data for the *Statistical Abstract* table.

To make use of these hyperlinks, the user is responsible for having a Web browser and access to the Internet. The Census Bureau does not support Internet access from this CD-ROM but provides these URL references as a convenience to our customers and users who are connected to the Web. The user needs to tell Acrobat initially where to find their Web browser and will need to click on the menu item on the top bar “File -> Preferences -> Weblink.” This brings up a “Weblink Preferences” window where the user will need to click on the Browse button in order to specify the location of their Web browser.

Figure 4. **PDF Table With Buttons****No. 31. Metropolitan and Nonmetropolitan Area Population: 1970 to 1998**

[As of **April 1, except 1998**, as of **July 1 (139,480 represents 139,480,000)**. Data exclude Puerto Rico. Metropolitan areas are defined by U.S. Office of Management and Budget as of year shown, except as noted]

Item	MSAs and CMSAs ²				
	1970	1990 ¹ (SMSAs)	1980	1990	1998
Metropolitan areas:					
Number of areas	243	318	276	276	276
Population (1,000)	139,480	169,431	177,505	198,407	216,478
Percent change over previous year shown . .	23.6	21.5	(X)	11.8	9.1
Percent of total U.S. population	68.6	74.8	78.4	79.8	80.1
Land area, percent of U.S. land area	10.9	16.0	20.0	20.0	20.0
Nonmetropolitan areas, population (1,000)	63,822	57,115	49,037	50,311	53,820

X Not applicable. ¹ SMSA=standard metropolitan statistical area. Areas are as defined June 30, 1981. ² Areas are as defined June 30, 1999. ³ Percent change from 1960.

Source: U.S. Census Bureau, *U.S. Census of Population: 1970*; "MA-98-3a Population Estimates for Metropolitan Areas and Components, Annual Time Series April 1, 1990, to July 1, 1998"; published 17 December 1999; <<http://www.census.gov/population/estimates/metro-city/ma98-03a.txt>>; and unpublished data.

Using Excel or Lotus Spreadsheet Files

More than 1,500 Statistical Abstract tables are available in both Excel (.xls or .xlw) and Lotus (.wk1 or .wk4) spreadsheet formats. These spreadsheet files can be directly opened with Excel or Lotus or other software packages that recognize these two file formats.

The files are located on the disc in a series of subdirectories under the main directory called PDF\LINKS. The subdirectories correspond to the various subject sections (i.e., health, law, energy) and appendices (APP) in the publication. The worksheet files are **00Snnnn.wk1 or 00Snnnn.xls**, where nnnn is the equivalent Statistical Abstract table number with leading zeros.

Most of these files contain either more years of data or more detail (additional variables or geographic units) than those shown in the book or in the Adobe Acrobat software. Also, tables from the U.S. Government statistical agencies will have Internet addresses located below the source citation for the tables to facilitate locating and accessing additional information or data.

Other Census Bureau CD-ROM Products

USA Counties: 1998

A popular county database with over 5,000 data items. This CD-ROM contains demographic, economic, and governmental information from 15 different Federal and private organizations. Not only do you get the most up-to-date data, you get many data in time series. This CD also features expanded COPY and new MAP functions.

State and Metropolitan Area Data Book: 1997-98

Another popular compendia product featuring Adobe Acrobat software, Internet links, and Lotus and Excel spreadsheet data. Features the latest demographic and economic estimates in comparison with 1990.

County and City Data Book: 1994

Well known reference source with data on counties, cities of 25,000 persons or more, and towns and places 2,500 or more. Extensive data from the 1990 census featured. Update (2000 edition) expected in fall 2001.
